

In 2021, the General Government registered a deficit of €1,161.7 million, equivalent to 8.0 per cent of GDP. The General Government debt amounted to €8,284.4 million or 57.0 per cent of GDP.

## General Government Balance and Debt under the Maastricht Treaty: First reporting for 2022

### General Government balance and debt position

The deficit of General Government for 2021 amounted to €1,161.7 million, an improvement of €76.0 million over the deficit recorded in the previous year. The balance is calculated as the difference between total revenue (€5,453.3 million) and expenditure (€6,614.9 million) of General Government. When comparing 2021 to 2020, total revenue increased by €639.9 million, while total expenditure increased by €563.9 million. The fiscal results for 2021 were again impacted by the COVID-19 pandemic and subsequent government measures to mitigate the economic, social and health risks associated with the pandemic.

**Table 1. Main Aggregates**

		2018	2019	2020	2021
General Government revenue	€ millions	4,908.1	5,147.9	4,813.4	5,453.3
	% of GDP	37.9	36.7	36.9	37.5
General Government expenditure	€ millions	4,639.6	5,065.7	6,051.1	6,614.9
	% of GDP	35.8	36.1	46.3	45.5
General Government surplus (+) / deficit (-)	€ millions	268.5	82.2	-1,237.7	-1,161.7
	% of GDP	2.1	0.6	-9.5	-8.0
General Government debt	€ millions	5,662.1	5,720.2	6,798.5	8,284.4
	% of GDP	43.7	40.7	53.4	57.0

When measured as a percentage of GDP, the General Government balance was equivalent to a deficit of 8.0 per cent, an improvement of 1.5 percentage points when compared to the deficit of 9.5 per cent that was registered in 2020.

General Government debt increased by €1,305.9 million over 2020 and stood at €8,284.4 million. The debt-to-GDP ratio for 2021 rose to 57.0 per cent, from 53.4 per cent in 2020 (Table 1).

### 2021 data

In order to arrive at the General Government sector's negative balance for 2021 of €1,161.7 million, adjustments were made to the balance of the Government's Consolidated Fund (NSO news release 053/2022), which registered a deficit of €1,242.2 million, an improvement of €227.6 million over the deficit recorded in 2020. The adjustments are necessary to shift from the Government's Consolidated Fund into an accruals-based exercise compiled in line with the established methodology. The adjustments also take in consideration the Extra Budgetary Units<sup>1</sup> (EBUs), which are classified within the General Government sector, as well as the Local Government sector. Table 3 provides the transition from the Consolidated Fund to General Government sector.

<sup>1</sup> A list at the end of this news release shows the EBUs which formed part of the General Government sector as at 31 December 2021.

The largest notable positive adjustment is the surplus recorded by the EBUs of €50.6 million, a decrease of €8.5 million over 2020. This was followed by time-adjusted cash transactions (€50.5 million) and the Treasury Clearance Funds (TCF) in non-financial transactions (€15.3 million). Other accounts receivable and payable amounted to €0.3 million, which included the Treasury Department accruals data, the EU Funds neutralisation adjustments and the COVID-19 tax deferrals.

In contrast, the main negative adjustments were related to standardised guarantees (€17.4 million), reflecting the expected called amount of the COVID-19 guarantee scheme, as well as rerouted transactions inside the General Government sector and public-private partnership (PPP) agreements (€11.8 million). Other negative adjustments include the difference between interest paid and accrued (€9.0 million) and other financial transactions (€8.9 million) (Table 3).

## Reporting and updates

On 30 March 2022, Malta submitted the government deficit and debt levels for the years 2018-2021, as part of the Excessive Deficit Procedure (EDP) Notification. This was done in accordance with Council Regulation (EC) No. 479/2009, as amended by Commission Regulation (EU) No. 220/2014.

When compared to the previous submission of 30 September 2021, the balance of the General Government was revised for all years under review. The surpluses recorded in 2018 and 2019 were revised upwards by €25.1 million and €17.9 million, respectively. These revisions were primarily attributable to the classification of the Planning Authority's Environment and Development funds inside the General Government sector from 1997 onwards, along with the availability of more audited accounts for EBUs and local councils.

The fiscal balance for 2020 was also revised upwards by €30.2 million, reflecting an upward revision of €44.3 million in the Other accounts receivable and payable category, mainly linked to the reimbursement of the Wage Supplement scheme through the EU REACT funds. Other revisions were noted in tax deferral dues, as well as a downward revision of €18.0 million resulting from wider availability of EBUs' and local councils' audited financial statements. Concurrently, the classification of the Environment and Development funds explains €13.1 million of the aggregate upward revision in the fiscal balance recorded in 2020.

The main revisions in General Government debt reflect the availability of more audited accounts for EBUs and local councils. Figures were revised upwards by €1.7 million for both 2018 and 2019. Similarly, an upward revision of €1.0 million was noted for 2020.

## Stock-Flow Adjustment (SFA)

The SFA, also referred to as the deficit-debt adjustment, captures those transactions or factors that influence government debt but are not reflected in the government balance. A SFA of 1.0 per cent of GDP was recorded in 2021. This suggests that the debt increased by more than implied by the annual deficit of 8.0 per cent of GDP. The SFA was mainly the result of increases in the holdings of Currency and deposits (0.6 per cent of GDP), as well as the holdings of Equity and investment fund shares (0.4 per cent of GDP), Other accounts receivable and payable (0.4 per cent of GDP) and Loans (0.3 per cent of GDP). These were partially offset by decreases in Other adjustments (0.5 per cent of GDP) (Table 4).

## Further information

The data presented in this release is different from the monthly news release on government finance, as the latter reports the Government's Consolidated Fund and is thus presented on a cash basis. This exercise is compiled in line with the European System of Accounts (ESA) 2010 and the Manual on Government Deficit and Debt (2019 edition). It covers the General Government sector, composed of the Budgetary Central Government, the Extra Budgetary Units and the Local Government sector. Apart from the Consolidated Fund, other government accounts, such as the Treasury Clearance Fund and the Sinking Fund, are included, while any financial transactions are excluded, and various accrual adjustments are incorporated.

Data for the Government's Consolidated Fund can be found at:

[https://nso.gov.mt/en/News\\_Releases/View\\_by\\_Unit/Unit\\_A2/Public\\_Finance/Pages/Government-Finance-Data.aspx](https://nso.gov.mt/en/News_Releases/View_by_Unit/Unit_A2/Public_Finance/Pages/Government-Finance-Data.aspx)

More information on the revenue and expenditure categories, as well as the financial assets and liabilities and debt, was published today in the News Release 'Quarterly Accounts for the General Government Sector: Q4/2021'. It can be accessed at:

[https://nso.gov.mt/en/News\\_Releases/View\\_by\\_Unit/Unit\\_A2/Public\\_Finance/Pages/Quarterly-Accounts-for-General-Government.aspx](https://nso.gov.mt/en/News_Releases/View_by_Unit/Unit_A2/Public_Finance/Pages/Quarterly-Accounts-for-General-Government.aspx)

The official EDP notification tables that were transmitted to the Commission can be found in the excel version of this news release at:

[https://nso.gov.mt/en/News\\_Releases/View\\_by\\_Unit/Unit\\_A2/Public\\_Finance/Pages/General-Government-Balance-and-Debt-under-the-Maastricht-Treaty.aspx](https://nso.gov.mt/en/News_Releases/View_by_Unit/Unit_A2/Public_Finance/Pages/General-Government-Balance-and-Debt-under-the-Maastricht-Treaty.aspx)

The EDP Consolidated Inventory of Sources and Methods in ESA 2010 is available on the NSO website. The document may be accessed at: [https://nso.gov.mt/en/nso/Sources\\_and\\_Methods/Unit\\_A2/Public\\_Finance/Pages/General-Government-Balance-and-Debt-under-the-Maastricht-Treaty.aspx](https://nso.gov.mt/en/nso/Sources_and_Methods/Unit_A2/Public_Finance/Pages/General-Government-Balance-and-Debt-under-the-Maastricht-Treaty.aspx)

Notes:

1. This list does not include entities which are already accounted for within the Government's accounting systems.
2. General Classification of economic activities within the European communities. Industries are grouped into 64 categories (A64) based on NACE Rev 2.

## Methodological Notes

1. Within the context of the EDP compilation, Government is taken to mean the General Government (S.13 sector according to the ESA 2010 definitions). This includes the Budgetary Central Government made up of Government ministries and departments, the Extra Budgetary Units (EBUs) which are classified as forming part of this sector, as well as all the Local Councils.
2. This release presents Government deficit and debt worked out in line with the procedure defined in the Maastricht Treaty (Article 104). The basic conceptual reference framework for this exercise is the ESA 2010 Manual on Government Deficit and Debt (2019 edition); which is in turn based on the European System of National and Regional Accounts (ESA 2010). This compliance with the reference framework allows for the international comparability of the data.
3. Article 104 of the Maastricht Treaty requires Member States to avoid excessive government deficits. In this respect the Commission monitors the development of the budgetary situation and of the stock of government debt. A protocol of the Maastricht Treaty specifies the reference percentages for general government deficit (which should not exceed 3 per cent of GDP), and for the gross *nominal* consolidated debt (which should not exceed 60 per cent of GDP).
4. The Stock Flow Adjustment (SFA) is the difference between the change in the stock of Government debt and the flow of annual Government deficit/surplus. Deficits normally contribute to an increase in debt levels, while surpluses reduce them. However, the change in government debt also reflects other elements which do not appear in the surplus/deficit figures.
5. The data contained in this release may be revised. Figures may not add up due to rounding.
