

In July 2022, the number of persons registering for work stood at 925 decreasing by 617 when compared to the corresponding month in 2021.

Registered Unemployment: July 2022

Data provided by Jobsplus for July 2022 indicate a year-on-year decrease of 580 persons registering under Part I, and an additional drop of 37 persons registering under Part II of the unemployment register (Tables 5 and 8). Registered unemployment levels decreased across all age groups for both males and females. Males accounted for 71.8 per cent of total registrants while females accounted for the remaining 28.2 per cent (Table 1).

Persons who had been registering for work for less than 21 weeks and those who had been registering between 21 and 52 weeks decreased when compared to the same month in 2021. A higher drop was recorded amongst those persons who were registering for work for more than one year (Table 2).

In July 2022, the number of persons with a disability who were registering for work decreased by 33 when compared to the previous year, reaching 225 persons. Males accounted for 77.3 per cent of total registrants with a disability (Table 3).

The largest share of males and females on the unemployment register sought occupations as Clerical support workers, with 20.6 per cent and 42.1 per cent respectively (Table 4). ■

Chart 1. Registered unemployment

Note: Data for reference years 2012-2021 is on an annual basis; data for reference year 2022 is for January to July.

Note: Percentage totals may not add up due to rounding.

Methodological Notes

1. This news release provides data on the number of persons registering for work with Jobsplus.

The National Statistics Office publishes another set of statistics regarding unemployment based on the Labour Force Survey (LFS) on a quarterly basis. When compiling LFS statistics, the NSO adopts the International Labour Organisation (ILO) definition, an internationally agreed definition on unemployment. This definition has also been adopted by Eurostat and is used by all EU Member States. More details regarding the methodology used for the compilation of unemployment statistics from the LFS may be found in quarterly LFS news releases.

Since Jobsplus records and LFS results measure two different facets of unemployment, the resulting figures are not comparable. Users are therefore cautioned that these two sets of statistics should not be used interchangeably.

2. As from the release published on 23 February 2016, annual average results are being worked out using a custom-made application which takes into consideration more data points to work out the mean for the year. This approach may give rise to differences resulting from rounding.

3. Registered monthly unemployment rates will no longer be published on the official version of this release. These rates are found in the excel version of this news release:

https://nso.gov.mt/en/News_Releases/View_by_Unit/Unit_C2/Labour_Market_Statistics/Pages/Registered-Unemployment.aspx

In April 2019, the NSO introduced a new set of EU-harmonised indicators on monthly unemployment based on the European Labour Force Survey (EC 577/1998).

4. The monthly unemployment rates from March 2022 do not feature in this release since administrative data on the labour supply from this month onwards are not yet available.

5. ISCO 08 is being used to classify occupations sought by the registered unemployed. For more information on "Structure of the International Standard Classification of Occupations (ISCO-08)":

[\(https://www.ilo.org/public/english/bureau/stat/isco/isco08/\)](https://www.ilo.org/public/english/bureau/stat/isco/isco08/)

6. **Definitions:**

- **Registered unemployment rate:** refers to the number of registered unemployed persons, both under Part I and Part II, as a percentage of the sum of the full-time gainfully occupied population and the total registered unemployed.

In computing the registered unemployment rates for the purpose of this release, only the full-time gainfully occupied population is taken into consideration. Persons employed on a part-time basis are not taken into account in this computation.

Registered unemployment rates are not comparable with LFS unemployment rates due to different sources of data collection. While LFS rates are based on sample survey estimates, registered unemployment rates are based on Jobsplus data (registered unemployment data and registered full-time gainfully occupied).

- **Long-term registered unemployment rate:** refers to those people who have been registering for work for more than twelve months. The long-term unemployment rate is calculated by working out the number of the long-term unemployed under Part I as a percentage of the labour force.
- **Part I of the unemployment register:** those registering under Part I are either new job seekers who have left school, re-entrants into the labour market or individuals who have been made redundant by their former employers.
- **Part II of the unemployment register:** those registering under Part II are either workers who have been dismissed from work due to disciplinary actions, left work out of their own free will, refused work or training opportunities or were struck off the register after an inspection by Law Enforcement personnel.
- **The Labour Supply/Labour Force:** for the purpose of this release, the labour supply is the sum of the registered unemployed and the full-time gainfully occupied population (excluding part-time employment).

7. The data on unemployment levels is final and not normally subject to revision.
