<sup>1</sup> The substantial increase in promise of sale agreements observed in December 2021 is largely explained by the expiration of a tax incentive related to the acquisition of property. In accordance with the Exemption of Duty in Terms of Article 23 Order - (S.L. 364.12) as amended by Legal Notice 122 of 2022, the stamp duty on property acquisitions was reduced from 5 per cent to 1.5 per cent on the first €400,000 of the property value. This applied to promise of sale agreements registered up to 31 December 2021, as long as the contract is entered into by not later than 30 June 2023.

## Methodological Notes

1. This news release presents data on property transactions based on final deeds of sale and promise of sale agreements ('konvenji') registered with the tax authority. The qualifier 'period of registration' common to the tables refers to such registration. Basing the data on the period when the final deed of sale or promise of sale agreement is registered with the tax authority, rather than when it is signed, is considered to produce more timely information.
2. The scope of this release follows the classification of the administrative data source, and includes only those transactions classified as 'residential' by the source. The data presented covers the following property types: airspace, boathouse, bungalow, farmhouse, flat/apartment, garage, garden, house, maisonette, penthouse, plot of land, semi-detached villa, terraced house, 'terran', urban tenement, and villa.
3. Excluded are transactions classified as 'commercial', comprising business premises and warehouse/storeroom, and those classified as 'other', a category that incorporates car space, field, grave and redemption of ground rent, amongst others.
4. Therefore, deeds/agreements relating to land for residential purposes ('plot of land') are included, while those pertaining to land for non-residential purposes ('field') are not.
5. Only deeds/agreements relating to the sale of property, which also includes sale by auction ('subasta') and sale after assignment of rights, are considered. Therefore, donations and exchanges, amongst others, are not included.
6. In the light of notes 2, 3, 4 and 5, this release must be viewed as a sub-set of all the property transactions and activities registered with the tax authority that take place during a given period.
7. In some cases, more than one property is listed under the same final deed of sale or promise of sale agreement. This release reports the number of registered final deeds of sale and promise of sale agreements, and not the number of properties falling under these deeds/agreements.
8. The residential property transactions considered are not limited to individuals (households), but may also involve other economic agents. Besides individuals, the administrative data source distinguishes between companies, authorities and bodies of persons.
9. The regions incorporating localities in Tables 3 and 5 correspond to the location of the property which has been or shall be purchased, not to the place of residence of the buyer or seller.
10. To achieve consistency, the methodological concepts used are aligned to the extent possible with the House Price Index concepts.
11. Users are reminded of several factors which might inhibit comparability between data on final deeds of sale and promise of sale agreements. These differences include: a) the time lag between promise of sale agreements and final deeds of sale; b) certain property being sold without a promise of sale agreement; and c) some promise of sale agreements falling through before the final contract is signed.
12. Data is provisional and subject to revisions, which may arise following updates in the source data.
